Test Your Child for Lead Poisoning

- Childhood lead poisoning is still a common problem for our children.
- Last year, the County of San Bernardino alone had 78 new cases of children exposed to lead.
- Lead could be harmful to your child's health and development.
- If your child is 1-6 years old, talk to your doctor about testing your child for lead at his or her next physical.

For more information, call the San Bernardino County Department of Public Health, Childhood Lead Poisoning Prevention Program, at 1-800-722-3777.
